GCCA+ Seychelles – Climate Change Communication Course (e-learning)

Instructions for Unit 1 – Introduction to Climate Change Communication

Total time to complete: approximately 4-6 hours

Thank you for your interest in following this course! There are 5 units in all. Here is what you need to know to complete Unit 1...

Unit 1 Learning Outcomes:

- Basic understanding of climate change communication
- Basic understanding of climate change science, impacts response options and policy
- Observed and felt sense of climate change impacts

Unit 1 consists of the following:

1) An introductory lecture, introducing the course, the training goals and agenda, and the logistics of how we're going to do the course, by Dr. Susi Moser (**Lecture 1**), available here (note to self-guided participants some of this lecture is specific to the first time it was run in Seychelles but go ahead and watch it anyway, it could be useful!).

Lecture 1 (course introduction by Dr. Susi Moser):

<https://www.youtube.com/watch?v=eBjMMoF9MwQ>

2) Next, do **Exercise 1**. This can be found in the Unit 1 folder on the MEECC (Seychelles) website.

3) There are **three short lectures provided by Dr. Daniel Etongo**, and we ask that you watch them all prior to proceeding. Here are the links to access them:

- Part 1 (science): <https://www.youtube.com/watch?v=2-TkLExVV18>
- Part 2 (impacts): <https://www.youtube.com/watch?v=TzybN21FNYQ>
- Part 3 (solutions): <https://www.youtube.com/watch?v=p5zxMYVnvds>

4) Then complete **Exercise 2** after watching those lectures. You can find the instructions in the Unit 1 folder.

5) Then watch the second part of Unit 1 (**Lecture 2**), given by Susi Moser. It provides a basic introduction to strategic climate change communication and its challenges. It is

quite long, but since it's a video recording, you can interrupt and continue later or watch it more than once if you want to review anything. It is available here: Susi's Lecture 2 (introduction to the basics of strategic climate change communication): <https://www.youtube.com/watch?v=nN6wROu29qw>

6) Finally, complete **Exercise 3**, and you can find it in the Unit 1 folder.

7) All along the way, we suggest you **keep notes** on what you're learning:

- There are print outs of the slides in Unit 1 folder
- Keep a journal for any questions, confusions, concerns and observations you may have and discuss these with colleagues or join an online discussion group like the Seychelles' Climate Change Education & Communication FaceBook group

8) For those of you who want to go deeper into the materials of Unit 1, we have provided some supplementary materials – check out the PDF doc in the Unit 1 folder

Enjoy the learning journey, stay safe, and be well!
